

What You Should Know About Cleary

SOLID, SUCCESSFUL & DEPENDABLE

Cleary Building Corp. specializes in the manufacturing, delivery, and construction of Customized Pre-Engineered Structures for satisfied owners throughout the United States since our incorporation in 1978.

WHAT DO WE MEAN BY PRE-ENGINEERED?

Every Cleary building is engineered at our corporate office, to specifically suit the building site and your requirements. With the assistance of our computerized design system, we can affordably design and build a structure to your precise needs. Our manufacturing plants produce your building to exact specifications, making installation fast and efficient.

THERE IS A CLEARY BUILDING SALES SPECIALIST NEAR YOU

We have multiple Cleary offices across the United States and one should be conveniently located near you. Not only is your Building Sales Specialist near you, they will always be close at hand to answer your questions or solve any problems which may arise.

THE CLEARY SYSTEM IS EXTREMELY VERSATILE

You will see our familiar trademark on buildings throughout the United States, and you will seldom see two buildings which are identical. Cleary builds virtually all types of buildings: churches, stores, manufacturing plants, warehouses, corn storage buildings, bus garages, airplane hangers, houses, and just about any other possible application. You will benefit from our Quality Custom Buildings at affordable package prices!

TOTAL SATISFACTION IS ASSURED

Refer to the "What customers have to say about Cleary" testimonial sheet on the next page and you will find comments from satisfied owners of various types of Cleary structures. We have earned this praise from our integrity, reliability, craftsmanship and follow through. If we did not deliver what we promise, we could not cover each building with the Cleary Dependable Warranty.

IN-DEPTH INVENTORIES MEAN FAST TURN-AROUND

We carry an enormous supply of lumber, steel and hardware. With volume buying we are able to hold costs down and have ready access to the material needed to manufacture your building.

YEAR ROUND PERFORMANCE

Our specialized equipment allows Cleary to build all year-round. Auger trucks, tractors, cranes and crew vehicles arrive at your building site in harmony with our flat bed semi containing your building. With hundreds of pieces of rolling stock, we have the equipment necessary to back-up our promises.
