built with pride before the

is applied[®]

Cleary engineers understand the special housing needs for all types of livestock. They also know that for you to be the most effective you need a building that “works” the way you need it to. So, they custom-design your structure to match your personal management style and provide a healthy productive environment for you and your animals. Cleary ventilating options make it a “breeze” to provide an adjustable natural flow of air to help eliminate moisture problems. Comfortable livestock are the most productive. Cleary Solar Heated buildings take advantage of the natural, radiant heat from the sun to help you keep your animals comfortable in a warm, dry, and healthy environment. High-performance

quality custom buildings at affordable packaged prices
corrugated clear polycarbonate panels on the south facing mansard wall are designed to collect and hold the heat generated by the sun’s rays, economically and efficiently. Cleary Solar Heated buildings... the BEST under the sun! You’ve probably seen our familiar trademark on livestock buildings throughout the United States...and seldom will you see two that are identical. Cleary engineers design each building to specifically suit the construction site and your requirements, so that you can design and affordably build a structure to fit your exact needs. You benefit with “quality custom buildings at affordable packaged prices!” Call your sales specialist today for a tour of buildings in your area and see for yourself the quality and workmanship.

Since 1978 Cleary Building Corp. Has Provided professionally engineered and custom designed buildings, with quality tested materials, skilled building crews, on time construction and warranties for lasting satisfaction.

Cleary Building Corp. History

The company was founded in 1978 to offer Clients a quality building that satisfied their needs at an affordable price. From day one, the Company has prided itself on offering the personal service our Client's deserve. Cleary Building Corp.'s world headquarters and flagship manufacturing plant is located in Verona, WI.

To better serve our national Clients, Cleary Building Corp. opened our second and third "state of the art" manufacturing plants in Grand Island, Nebraska (1995) and in Hazelton, Idaho (1998).

World Headquarters and Manufacturing Plants
Verona, WI

Midwest Manufacturing Plant
Grand Island, NE

Western Manufacturing Plant
Hazelton, ID

Cleary Building Corp. constructs buildings for suburban, farm, commercial, residential and equine applications. We have constructed churches, stores, manufacturing plants, warehouses, grain storage buildings, bus garages, airplane hangars, houses, and many other quality products. The Cleary Building Corp. pre-engineered structures continue to be the preferred building solution accepted by engineers, architects and building officials.

Cleary Building Corp. is firmly committed to bringing Clients lasting quality at affordable prices. While Cleary Building Corp. is large enough to handle our Clients' building needs and plans additional expansion, we maintain a culture that ensures the personal service Cleary Building Corp. Clients deserve.
