RE: New Pole Barn

To Whom It May Concern,

I recently had a pole barn built on my property by Cleary Building Corporation and I just wanted to compliment the people who worked on my barn.

I was very impressed with everyone involved in this project.

Brian Smith was my salesman and from the start he took a personal interest in me and my barn. When I first stopped in at their office in Wanatah, he stopped what he was doing and took time out to talk to me. He priced up my barn and explained everything to me. It was his time and patience that convinced me to go with Cleary over FBI or Morton.

The people who impressed me the most though, was the crew who built the barn. They started the building on Wednesday and finished it on Thursday afternoon. They were great! The only breaks they took during the day were for lunch. They never slowed down. I was really impressed with the way they worked together. The foreman, Brent Silfie, did not have to tell John Myer or Brian Mitchell what to do, they all knew what needed to be done and they did it. It was fun watching them. In fact, I got tired just watching them.

Even though the crew worked very fast, they did not make mistakes. Their workmanship was very good. I do not have one complaint about the quality of their work or professionalism in building the barn.

Overall, I just want to say that I am very satisfied with my experience with Cleary Building Corporation and with everyone I dealt with, from the office secretary through to the construction crew. Thank You!
